H-166, U.S. CAPITOL

WASHINGTON, DC 20515-9086

**BRIAN P. MONAHAN, MD, MACP
PROFESSOR OF MEDICINE AND PATHOLOGY**

January 20, 2016

The Honorable Bernard Sanders
United States Senate
332 Dirksen Senate Office Building
Washington, D.C. 20510

Dear Senator Sanders:

This letter summarizes your general health history and current medical evaluation prepared at your request. My office has served as your physician for the past 26 years. I am certified by the American Board of Internal Medicine in Internal Medicine, Hematology, and Medical Oncology.

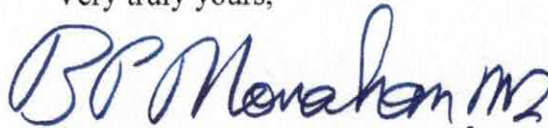

Your most recent physical examination was on November 18, 2015 when you were 74 years old, 72 inches tall and weighed 179 pounds. Your general physical examination was normal including a blood pressure of 136/81 mmHg, and a pulse of 72. Comprehensive laboratory test results indicated total cholesterol of 196 mg/dL, with an LDL cholesterol of 125 mg/dL and an HDL cholesterol of 46 mg/dL. Your thyroid metabolic profile and complete blood count was normal. Your fasting blood glucose was 94 mg/dL. Your electrocardiogram was normal.

Over the years, you have been treated for medical conditions including gout, mild hypercholesterolemia, diverticulitis, hypothyroidism, laryngitis secondary to esophageal reflux, lumbar strain, and complete removal of superficial skin tumors. Your past surgical history is consists of repair of your left and right side inguinal hernias by laparoscopic technique, and a right true vocal cord cyst excision. You have no history of cardiovascular disease.

Your current medications include daily levothyroxine, and intermittent use of indomethacin. You do not use tobacco and use alcohol infrequently. Your most recent colonoscopy was normal. You are up-to-date on recommended vaccinations.

You are in overall very good health and active in your professional work, and recreational lifestyle without limitation.

Very truly yours,

Brian P. Monahan, MD, MACP
